

Level1:

Core Assets Needed:

- **Map/Background:** Green hills terrain with dirt path
- **Towers:** Fire Flower, Koopa Shell, P-Switch sprites
- **Enemies:** Goomba, Koopa Troopa, Paragoomba sprites
- **UI Elements:** Health bar, wave counter, coin display
- **Projectiles:** Fireball, shell animations
- **Grid overlay** for tower placement

Technical Considerations for SFML:

- Sprite sheets for animated characters
- Tile-based map system for the grid
- Path waypoints for enemy movement
- Simple state management for tower/enemy interactions
